WORK EXPERIENCE

Front-end Developer

Juncture | 2022- Now

- Built several reusable React components for various web applications, including dropdown menus, search bars, and modal windows. These components have saved time and improved consistency across projects.
- Designed and implemented responsive layouts for several web applications, using CSS media queries and other techniques to ensure that the pages look great on any device or screen size.
- Had extensive experience debugging and troubleshooting React applications, using tools like the React DevTools extension and console.log statements to identify and fix issues quickly

Content writer (Volunteer)

Teen Hug | 2021

- Research industry-related topics
- Prepare well-structured drafts using digital publishing platforms
- Promote content on social networks and monitor engagement
